4th May, 2020

Dear Distinguished Colleagues,

POSTPONEMENT OF 2020 AGMSC IN KANO

I bring you greetings from the President and leadership of our dear Society, EMSON. We hope you're all keeping safe from the raging COVID-19 pandemic which has now altered the world as we know it. It is our prayer that while we do our human possible best to keep safe, we continue to pray for God's timely intervention in bringing this pandemic to an end.

As you may recall, the local organizing committee (LOC) of the EMSON Annual General Meeting and Scientific Conference (AGMSC) Kano 2020 recently published conference fliers and posters of the September meeting in all our platforms and website. We thank the LOC for doing a great job so far in the preparation towards this very important meeting.

Upon careful analyses of all the current realities and unpredictability of the COVID-19 pandemic, the EMSON Exco has found it necessary to postpone this year's AGMSC to September 2021. Kano will still retain the hosting rights. This painful decision was taken by this Exco in the best interest and safety of its members and the overall good of EMSON.

We're very grateful to the LOC for their efforts even in trying moments like this. Please continue to keep safe as we fight this pandemic together. May the Almighty God deliver us from this pandemic and bring healing to our world sooner than we expect. Amen. Long live EMSON. Long live Federal Republic of Nigeria.

Prof. Andrew Uloko,

Secretary General, EMSON
